

Please know that the Boston Retirement Board is undergoing a replacement of its present pension system software to an entirely new system. This conversion will take place from January 24, 2013, until February 8, 2013.

During that period the Board's capabilities will mostly be limited to informational requests/exchanges and counseling. We ask that members present only the most emergent requests during this time frame. However, obviously we will accept any retirement applications and note that the processing of new and recurring monthly retirement benefit checks will be unaffected by the conversion.

The new state of the art software will allow us to more accurately record members' information and eventually reduce retirement business processing times. We apologize for any inconvenience this change may cause. We are looking forward to using the new system to better serve you in the near future.
